IES TEROR

**GOOD PRACTICES
ELECTRICIAN VOCATIONAL FAMILY**

IES TEROR

1- GOOD PRACTICES

- Design and execution of every electrical system in a single family or commercial premise.

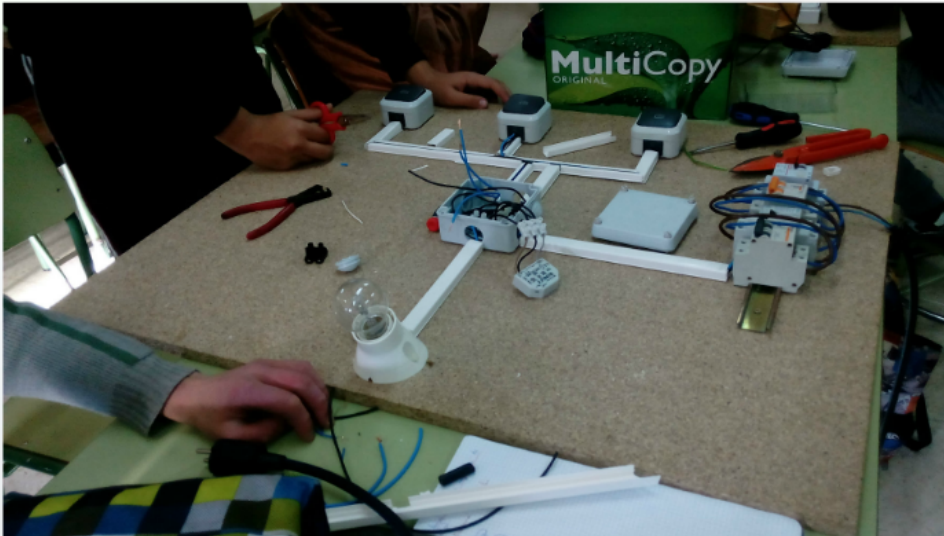

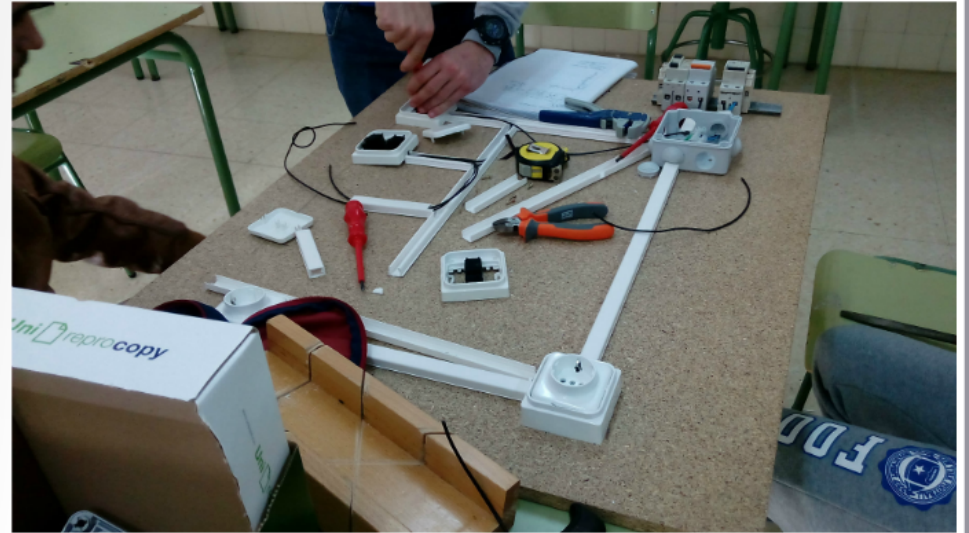

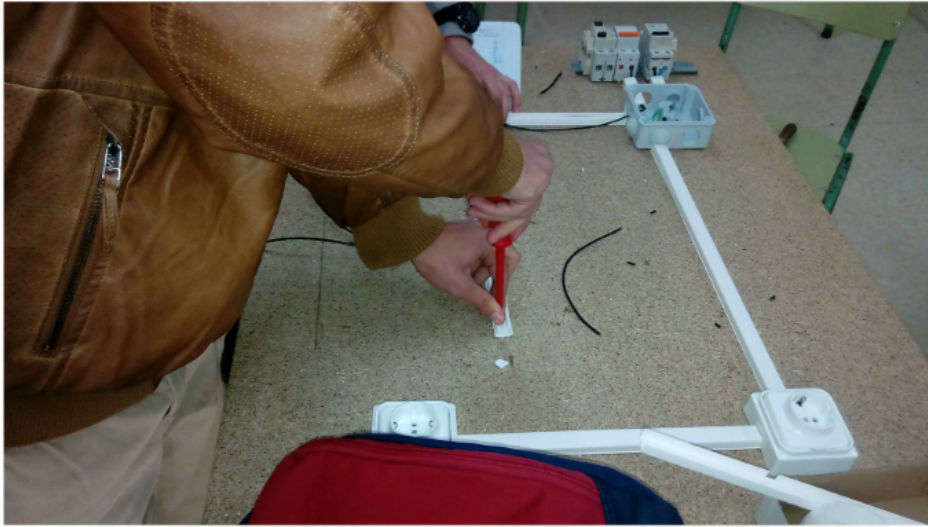

2-SCOPE OF COOPERATION WITH BUSINESS.

HOW IS IT ORGANIZED?

- During the second term the students carry out different activities under the supervision and guidance of their teachers.
- The idea is to design and realize every electrical system in a single family or commercial premise.
- These practices are not only made in the workshops but they put their abilities into practice improving our school installations or making new ones requested by our administration
- These experiences are presented in different professional shows in our school or other schools from the area.
- We send invitations to local schools, municipality institutions, different enterprises related to our educational offer.

DURING THE PROFESSIONAL SHOWS

- They inform and explain about everything they have done
- Simulations take place where the visitors can experiment on any educational board on display. They can modify or contribute with new ideas.
- Professionals from the electricity field give lectures (many of them have been students from our school who have now their own company)

3-RESULTS OF THIS COOPERATION

It is a good opportunity to meet business people and different types of companies where our profession develops.

- To stimulate students to go on studying. -Encourage self-taught work, Improve team-work skills, communication
- It is a shop-window where they can show their abilities. Many enterprises offer them jobs.
- To allow them to experiment and be themselves responsible of their work, their end product.
- To build a bridge between VET and WOW.
- Learn how to learn not only during the period in which they are in the educational system but throughout their life “Life Long Learning”
