

IT-GYMNASIET UPPSALA
Sweden

IT-GYMNASIET

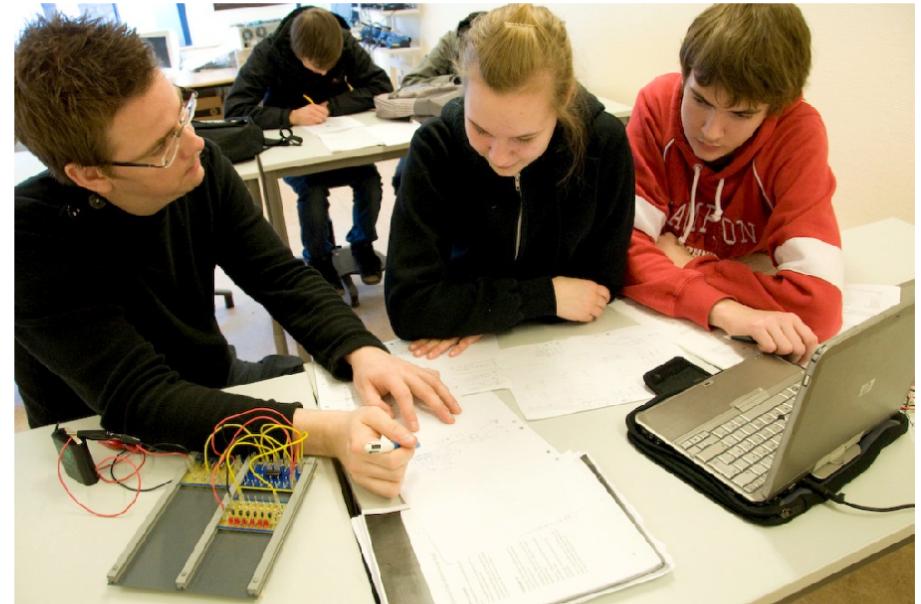

- Upper Secondary School in Computer Communication and Computer Networking
- Vocational Educational Training Program
- Information Technology as a tool for learning

Microsoft®
IT Academy Program

We cooperate with working life in order to:

- Increase the interest in IT
- Develop the IT-competence of young people
- Build a bridge between our students and working life
- Increase the status of upper secondary vocational education

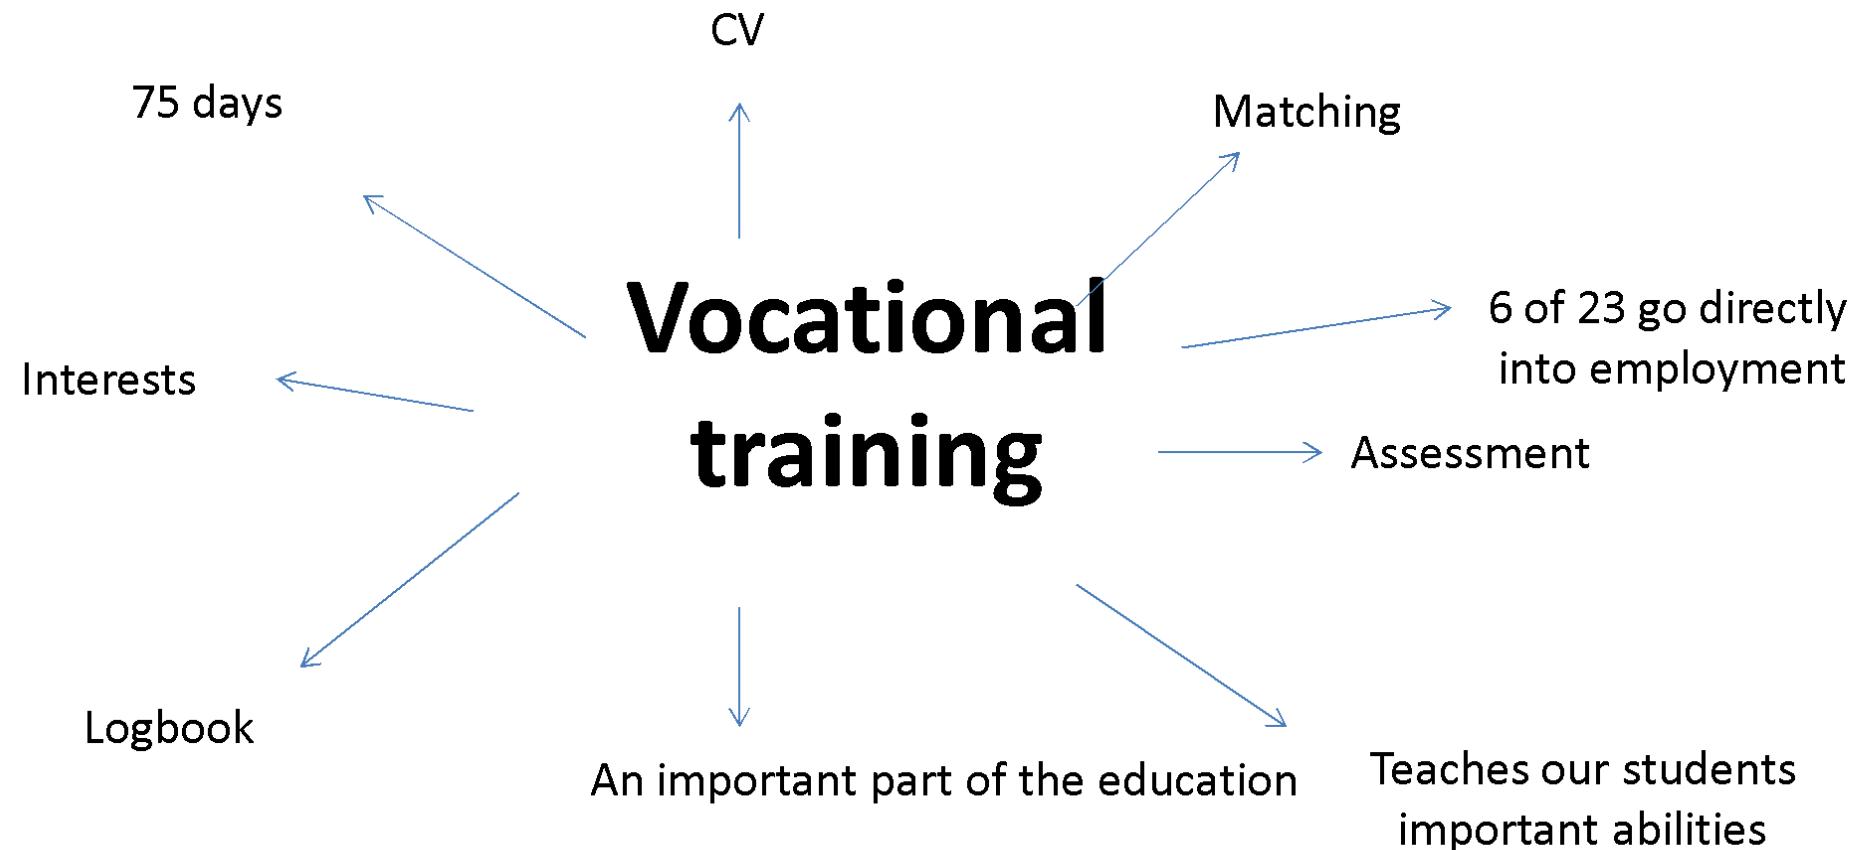

Possible future employment for our vocational students:

- **Network Administrator**
- **Server Administrator**
- **Database Administrator**
- **Computer Support Technician**

IT-GYMNASIET

VOCATIONAL TRAINING

We cooperate with a large number of companies,
government institutions and public services

First step towards advanced knowledge

Business council:

Consists of companies that we cooperate with, employment agencies, university representatives, head masters of the school, coordinators and students. The objective is to build a bridge between the world of work and upper secondary education within information technology.

Guest lecturers:

We invite guest lecturers that educate our students in everything from the latest advancement within IT till what the job market expects from our students when it comes to service-mindedness and willingness to learn.

Course content:

We get input from our partners as to what is required in the curriculum in order to meet the future needs of IT-knowledge.

IT-GYMNASIET

we |ove IT.
